Message from Hon'ble Vice Chancellor

Recognizing potential of Ayurveda in mother and child health care, all stakeholders have the mandate to play a vital role to explore new horizons to evolve protocols for protection, prevention, promotion and management of maternal as well as pediatric health problems. It gives me immense pleasure to organize wonderful event at our university in auspicious presence of worldwide dignitaries at one platform. Outcome of this event will indeed open the Pandora of opportunities for all stakeholders to make concrete advancements in these fields.

Prof. (Dr.) Radhey Shyam Sharma

Introduction

Mother and Children are the most vulnerable members of the population. Adverse social and economic conditions cause greater suffering to this group than to the other members of the community. Children are vulnerable primarily because they depend on a nurturing adult particularly their mothers to survive and mothers are vulnerable because of the risk of the illness and death associated pregnancy and child birth. These factors are compounded by some socio-cultural realities of motherhood and child rearing which has negative effect such as scarce food, poor access to health facilities etc.

Access to quality mother and child health care remains a problem for most families in developing countries like India. Health facilities are far from where they live, services are inadequate or the cost of care is unaffordable that in turn worsen poor mother and child health in the country.

Although there is remarkable decline in morbidity and mortality caused by poor pregnancy and perinatal care in mother as well as various infections and malnutrition in children in last few years but the statistical data draw attention on proper and effective management of the MCH. This goal of comprehensive and integrated mother and child health care (MCH) cannot be achieved without association and active involvement of manpower, technology & wisdom of Ayurveda.

Ayurveda the age old and time tested system of ancient India has great potential to deal with such health problems. We have plenty references and literature for mother and child health care in our ancestral doctrine which may be a gold standard for mother and child health care. Rajasthan has a largest network of AYUSH practitioners and infrastructure serving maternal and child health care in the state. That's why the idea generated to organize an International conference to provide an interactive platform for the stakeholders to acquiring extensive exposure on manifold issues in the MCH and share the meaningful experience in this concern.

About University

Dr. S.R. Rajasthan Ayurved University, Jodhpur was established by the Govt. of Rajasthan in 2002 and was made functional since 2003-04, situated in village Karwad, Jodhpur on National Highway No. 65 (Nagaur Highway). This University is the second Ayurved University and first AYUSH University of the world conducting Ph.D., M.D./M.S. in Ayurveda and Homoeopathy, BAMS, BHMS, BUMS and BNYS, B.Sc. (AYUSH Nursing), DAN&P and Certificate Courses in Ksharkarma, Panchkarma & Osteopathy and Yoga. University has state level jurisdiction with affiliation of 47 AYUSH institutions including National Institute of Ayurveda, Jaipur and MMM Govt. Ayurved College, Udaipur. Panchkarma Centre of University has been awarded as *Centre of Excellence* by the Govt. University runs 220 bedded Hospital with multispecialty clinics.

About Jodhpur

- ◆ **The Historical city:** Jodhpur is the second largest city of Rajasthan state. It was founded by Rao Jodha in 1459 which represents legacy of fighters of Marwar region. It is known as **Blue City** due to the blue colored land scape. This is also known as **Sun City** for the bright sunny weather it enjoys all over year.
- ◆ **Tourist Destination:** Jodhpur is a popular tourist destination featuring many places, forts, palaces set in the stark landscape of the desert.
- ◆ **Educational Hub:** It is also an education hub of West Rajasthan having several globally reputed research center like KAZRI, AFRI, DMRC, DRDO, and well known universities like NLU, Agriculture Universities and IIT.
- ◆ **Medical Hub:-**Also the city is well known for its medical facilities in the state as the Jodhpur felicitated with AIIMS, Ayurved University and Medical college.

CONNECTIVITY

Jodhpur is a well connected city with Rail, Road and Air. Its own domestic airport is located around 5 km from the city centre and direct flight from Delhi, Mumbai and Jaipur are available on daily basis. The city is also well connected with road and super delux and Volvo coaches are available for Delhi and Jaipur. The Sun City is well connected with Rail route with all four metro cities of India.

CLIMATE

Generally the climate of Jodhpur is hot and dry but it varies by various seasons. Winter enters the city from November to February. In this season the maximum temperature is around 26^oC and the minimum temperature is around 10^oC. So light woolen clothes may require during stay here in winter.
