

PHOTOGRAPHY & AUDIO-VISUAL AIDS SECTION

The section is under the control of Dept. of Pathology. It is well equipped for modern Digital Photography technique which includes the Still Photography, Videography & Microphotography. The Photographer every day visits the operation theatre complex and remains readily available for Photography of operative procedures. For cases of clinical interest, the Photographer can be sent for in the out door departments and the indoor wards. These services are utilized for regular monthly CME which is attended by all the faculty members both from clinical basic subject departments. The services are also utilized for the purpose for research publication in various journals. Although the audio-visual aids are available in all the departments, these are also available in Photography section to be utilized during workshop being organized from time to time for skill up gradation and to update the knowledge. The section also prepares & designs posters for public display during health exhibition being organized from time to time.
