

### Brief Introduction of department of surgery:

• The department of surgery of Sardar Patel medical college & Associated Group of Hospitals of Bikaner, Rajasthan began training sur-gery residents over 55 years ago. Since its in-ception in 1959, the program has focused on training excellent surgeons in India. Today approximately half of our graduates go into private practice and the remainder pursue careers in academic surgery. This reflects the unique partnership that was created in 1959 between the University of Rajasthan now become Rajasthan University of Health Sciences, jaipur and S.P.Medical College, Bikaner. The Department has a dual role to provide trained surgeons for the urban and rural communities of the India and prepare future aca-demic surgeon-leaders. Our graduates of the S.P.Medical college's surgical program that have chosen careers in academic surgery populate all major health concern programs of government. The Department and its affiliates offer an exceptional training program in all areas of surgery and extraordinary opportunities for clinical and basic science research. The educational mission of the Department is to create surgeons who are clinically and technically superb while emphasizing continued learning, ethical principles, service, interpersonal re-lationships, and compassionate patient care.
